GOODYEAR® INNOVATIONS TO HELP REDUCE COST

FUEL MAX® TECHNOLOGY
Goodyear tires with Fuel Max Technology can help fleets save money on one of their largest operating costs — fuel. Featuring innovative fuel-saving compounds, tire constructions and tread designs, Fuel Max tires help reduce rolling resistance in every wheel position.

DURASEAL TECHNOLOGY®
The world’s first built-in tire sealant for commercial truck tires, DuraSeal Technology helps reduce downtime and costly repairs by keeping trucks moving in the face of nails, screws and other sharp objects. Tires with DuraSeal Technology instantly seal punctures up to 1/4 " in the face of the tread* to help keep hardworking fleets moving.

*Seals up to 1/4-inch tread punctures only. Does not seal sidewall punctures.

UNICIRCLE® RETREAD TECHNOLOGY
Goodyear can help extend the life cycle of tires with innovative, spliceless UniCircle retreads. Installed with no cutting, UniCircle retreads are uniform and balanced and help fleets get long miles to removal.
