REGIONAL/URBAN COMMERCIAL TRUCK TIRES

GOODYEARTRUCKTIRES.COM
Goodyear® is one of the best-known tire brands in the industry, and it’s more than just an iconic name. It’s a brand that stands for reliability, integrity and innovation — a brand that continues to earn the trust of customers again and again.
LEADERS IN INNOVATION

119+ YEARS of continual innovation

2,600+ ENGINEERS & SCIENTISTS around the globe

37 MANUFACTURING PLANTS with offices in almost every country

#1 in brand awareness*

SERVICE YOU CAN DEPEND ON

2,300+ LOCATIONS from coast to coast

24/7 ROADSIDE SERVICE available nationwide

2 HOUR TARGET ROLL TIME for roadside service

100% OF SERVICE TECHNICIANS are Tire Industry Association-certified

*Source: 2020 IPSOS U.S. Consumer Brand Health Tracker, Total Unaided Awareness of Tier 1 Brands.
TOTAL MOBILITY™

TRUSTED PRODUCTS
Innovative products for any fleet application
Features innovative technologies like DuraSeal™, Fuel Max® and UniCircle®

PREMIER SERVICE NETWORK
2,300+ locations throughout North America ready to help your fleet
Consistent, efficient service with every visit

TIRE MANAGEMENT
Real-time tire monitoring, intelligent analysis and customized reporting
All in the name of optimizing your fleet, your budget and your time
TIRES AND RETREADS THAT HELP DRIVE FLEET SAVINGS

Having the right products is the only way to give any fleet Total Mobility™. Goodyear® offers a wide selection of innovative tires that feature advanced technologies to help fleets of any size and application reduce their operating costs.

A GOODYEAR DEALER NETWORK THAT’S BUILT AROUND YOU

With more than 2,300 locations and industry-leading roadside service, Goodyear Commercial Tire & Service Centers and Network Dealers are always nearby to give you a helping hand. We have the experience, knowledge and services to help keep your equipment up and running.

PROFESSIONAL FLEET SERVICES

Goodyear Commercial Tire & Service Network members use state-of-the-art service equipment, and our trained technicians adhere to the Tire Industry Association CTS 200 level for high-quality service at any location.

• 24-hour emergency road service
• 2-hour target roll time
• Sustainable and cost-saving retreading for commercial and off-the-road tire casings
• Fleet survey to enhance tire longevity and performance
• Tire performance monitoring for both commercial and off-the-road tires

THE FLEETHQ™2GO APP

Instantly connects drivers to 24/7 roadside service in a couple quick taps of a screen.
LET GOOD YEAR® LEAD THE WAY
Get real-time tire monitoring, intelligent analysis and customized solutions, all in the name of optimizing your fleet, your budget and your time.

**MONITORING** – STAYING AHEAD OF THE GAME
- Digital inspections
- Automated inspections
- Real-time active monitoring

**INSIGHTS** – DATA IS THE NEW STREET SMAR T S
- All data is transmitted to the Goodyear Mobility Cloud™
- Custom tire insights based on your unique specifications
- Reporting and alerts to help you proactively manage critical tire data on your terms

**SERVICE** – ALWAYS BY YOUR SIDE
- 24/7 roadside assistance
- 2,300+ Goodyear Commercial Tire & Service Network Locations
- Service coordination through Goodyear Fleet HQ®
- Insights to help intelligently direct labor
TIRE MANAGEMENT TOOLS EXCLUSIVELY FROM GOODYEAR

Proper fleet tire management is about more than putting the right tires on the right vehicles. Using industry-exclusive tire monitoring tools, Goodyear analyzes real-time tire data, alerts fleets with valuable insights and delivers timely service to minimize tire costs down and maximize vehicle uptime.

GOODYEAR TIRE OPTIX™

This digital inspection toolset enables you to capture data accurately and efficiently with instant results.

GOODYEAR TPMS PLUS™

TPMS Plus is a connected, active monitoring system that goes beyond the benefits of traditional dashboard monitoring. Using Goodyear’s unique, fleet-specific algorithms, TPMS Plus helps identify critical issues, inflation trends and much more, allowing you to be proactive instead of reactive.

GOODYEAR CHECKPOINT™ — DRIVE-OVER READER

Goodyear CheckPoint provides automated inspections of tire pressure and tread depth. Ideal for high-volume yards, this solution enables large quantities of vehicles to be inspected and offers a frequently updated snapshot of tire health.
**GOODYEAR® INNOVATIONS TO HELP REDUCE COST**

**FUEL MAX® TECHNOLOGY**

Goodyear tires with Fuel Max Technology can help fleets save money on one of their largest operating costs — fuel. Featuring innovative fuel-saving compounds, tire constructions and tread designs, Fuel Max tires help reduce rolling resistance in every wheel position.

**DURASEAL TECHNOLOGY®**

The world’s first built-in tire sealant for commercial truck tires, DuraSeal Technology helps reduce downtime and costly repairs by keeping trucks moving in the face of nails, screws and other sharp objects. Tires with DuraSeal Technology instantly seal punctures up to ¼” in the face of the tread* to help keep hardworking fleets moving.

*Seals up to ¼-inch tread punctures only. Does not seal sidewall punctures.

**UNICIRCLE® RETREAD TECHNOLOGY**

Goodyear can help extend the life cycle of tires with innovative, spliceless UniCircle retreads. Installed with no cutting, UniCircle retreads are uniform and balanced and help fleets get long miles to removal.

**24% improvement** in average projected mileage vs G182 RSD†

**30% better** rolling resistance vs G182 RSD‡

†The Fuel Max RTD evaluation construction testing resulted in increased projected miles to removal as compared to the G182 RSD under everyday real-world testing conditions with the focus fleet. The results of the Fuel Max RTD evaluation construction are as expected due to the features of the tire, including: optimized tread compound, tread design and manufacturing processes. The Fuel Max RTD evaluation construction tires were worn to 76% of tread life vs the G182 RSD worn to 69% of tread life. Projected miles are used to normalize percentages of nonskid worn and new tire nonskid depths. The Fuel Max RTD construction spec has non-substantive design changes for which non-effect was confirmed by internal Goodyear modeling and testing.

‡Laboratory tire rolling resistance was obtained in accordance to the ISO/FDIS 28580 ‘Passenger car, truck and bus tires – Methods of measuring rolling resistance – Single point test and correlation of measurements results’ test procedure. In addition, multiple tires of each tire type were tested on rolling resistance.

In the testing, the Goodyear Fuel Max RTD demonstrated a lower rolling resistance vs the G182 RSD under the same conditions. Historical IRC data on G182 RSD yielded similar results. This result was expected due to the features of the tire including an optimized tread compound, tread design and manufacturing processes.

Testing results were completed on Fuel Max RTD and G182 RSD in size 11R22.5 LR G. Actual results over time could vary based on a number of factors. These could include, but are not limited to: types of vehicles, road conditions, driving habits, tire inflation and maintenance, vehicle loads and temperature.
