A FUEL-EFFICIENT TIRE IDEAL FOR REGIONAL SERVICE

The Goodyear® G182 RSD GHG with lower rolling resistance fuel compounds offers exceptional fuel efficiency to help your fleet prepare for upcoming Greenhouse Gas (GHG) requirements. This tire offers enhanced traction in the rain and snow from its deep, non-directional 24/32” open-lug design. Plus, tie bars in the shoulder blocks and a bladed tread pattern help the G182 RSD GHG deliver long, even wear.

New GHG Requirements

The EPA and NHTSA published a rule to establish a comprehensive program that will reduce Greenhouse Gas (GHG) emissions and increase fuel efficiency for on-road, heavy-duty vehicles. These fuel economy standards were voluntary for 2014 and 2015 models and will be required for 2016 models.

If you’re looking for an original equipment tire that will help keep your fleet moving for less, choose the G182 RSD GHG.

Greenhouse Gas Compliant
A GHG-COMPLIANT TIRE
IDEAL FOR REGIONAL SERVICE

- LOWER ROLLING RESISTANCE COMPOUNDS help reduce fuel consumption
- NON-DIRECTIONAL TREAD DESIGN helps provide a uniform footprint
- ENHANCED RUBBER VOLUME helps deliver many miles to removal
- DEEP 24/32" OPEN-LUG DESIGN helps provide traction in wet or snowy conditions
- TIE-BAR SHOULDER AND BLADED TREAD PATTERN help deliver long, even wear

Choose Goodyear to provide your fleet with a total solution of industry-leading tires, services and profitability tools to help lower your operating costs. For more information, please visit goodyeartrucktires.com.
