Fuel is one of the biggest expenses in the trucking industry. That’s why Goodyear offers a complete family of tires and retreads featuring Fuel Max Technology. These SmartWay-verified tires incorporate fuel-efficient compounds, constructions and innovative tread designs to help lower rolling resistance and reduce your cost per mile. Fuel Max tires are available for all wheel positions including wide base models.

See how you can make Goodyear tires and retreads with Fuel Max Technology part of your total solution of trusted products, nationwide Dealer network, reliable service and fleet management tools at goodyeartucktires.com.
